

Display Cone LED Light 1.53m & Remote

Light Function

- ABS Plastics Material
- Power Supply: 220V/50Hz
- Power Consumption: 15W
- Operation: Remote Control
- Colour function: 16 options
- Light Source: LED
- Dimensions of Cone: 500mm x 1530mm
- Packaging: 520mm x 500mm x 1560mm
- Nett Weight: 10kg Gross Weight: 12kg

HERMES Display LED Ice cream cone 1.53m

Q: What material is the Hermes Display LED Cone made of?

A: The Display LED Cone is made of durable and weather-resistant materials suitable for outdoor use.

Display cone is made of ABS Plastics Material: ABS engineering plastics is a terpolymer composed of acrylonitrile (A), butatriene (B), and styrene (S). It has the common properties of the three components. A makes it resistant to chemical corrosion and high temperature and possess certain surface hardness, B makes it highly elastic and tough and S enables it to have the machinability of thermoplastic and improves electrical properties. So, ABS plastic is a kind of "tough, hard and rigid" material with excellent comprehensive performance and wide application, which has been widely used in machinery, electrical appliance, automobile, aircraft, ship and other manufacturing industries and chemical industries.

Q: Does the Display cone come with a power source or does it need to be plugged in?

A: The lamp comes with a power source and can be plugged into a standard electrical outlet for operation.

Q: Is the Hermes Display LED Cone easy to assemble?

A: Yes, the lamp is easy to assemble and comes with simple instructions for setup.

Q: Can the Base be filled

A: The Lamp Base is hollow with a water inlet that can be filled with water or sand, effectively preventing the lamp body from tipping over.

Q: How bright is the light emitted by the lamp?

A: The lamp emits a soft and ambient light suitable for outdoor advertising and decorative purposes.

The lamp uses Led modules and the brightness of the lamp may not be obvious under external light intensity . Better performance in the dark.

Long Service Life of bulb

The service life of the bulb is approximately 25,000 hours by using high-quality LED lamp beads, automatic patch, reflow soldering technology and the aluminium substrate which brings excellent heat dissipation performance. With GB standard E27 screw socket, it's easy to be installed.

Remote Operation

The lighting modes of the model lamp can be adjusted according to different use requirements.
